HOW TO BUY A CENTRALVAC BUILT-IN VACUUM SYSTEM

Items Needed for a CentralVac Installation

The following items are needed for a functional CentralVac built-in vacuum system.

1. Power Unit
2. Accessory Package (contains hose and all the other accessories needed)
3. Generic Inlet Kit (combine 1 or 3 inlet kits to total the number of inlets needed)
4. Inlet Valves (choose either Direct Connect or Low Voltage)
5. Mounting brackets (purchase separately if Low Voltage inlets are used)
6. PVC Pipe

Here are some options you might want to consider.

1. An extra utility inlet for the garage.
2. A standard hose for the garage, or the Garage Non-Electric Accessory Package.
3. A VacPan or VacuSweep for the kitchen and or utility room.

Note: If you live in a high altitude area (5,000 to 7,000 ft. above sea level) you may need to move up to the next larger unit, or go to a double motor unit. Remember, you can never have a power unit that is too big, or have too many inlet valves in your home!

## RF Control Kit w/ Key Fob
CVT-RF-KIT ...............$174.99

This kit can be used as a workaround for bad low voltage wires. By mounting the receiver to your vacuum, you can remotely turn the vacuum on and off from anywhere in your home.

RF Accessories:
CVT-RF-FOB ...............$62.99

## Turbo Dust Interceptor
CVT-04-0100 ...............$33.99

This small turbo dust filter interceptor is designed to mount between your hose end and wand. It’s an ideal way to save money on vacuum cleaner bags for your canister, as it will trap bulky fibrous material from passing into your central vacuum. The unit includes adaptors to make it compatible with both 1.25” (32mm) and 1.375” (35mm) wand sets.

## Micro Tools
CVT-03-0160 ...............$14.99

Micro Tools are perfect for cleaning sewing machines, wall heaters, air conditioners, keyboards, printers, computers, dvd’s and almost anything that’s too small to get an ordinary vac tool into. Kit comes with 3’ hose, adapters, oval mini brush, micro round brush, crevice tool and extenders.
**VacPan™**

The VacPan™ is easy to install in new and existing kitchen cabinets, walls, or any location with very little clearance. The piping to the system is connected to the top of the VacPan™. The VacPan™ can be installed in a normal 2x4 wall.

Flip lever to the side with your toe, starting the vacuum system, and sweep the dirt into the inlet. Flip the lever back with your toe and the vacuum system will stop.

**VacuSweep®**

The VacuSweep® Sweep Inlet Valve is designed for the person who wants the benefits of a central vacuum system and ease of a broom in a contemporary style. For use in kitchens, mudrooms, workshops, hair salons, retail stores, any sweepable area either residential or commercial, the VacuSweep® Inlet Valve will meet and exceed all your vacuuming needs.

- Contemporary attractive design leaves no unsightly gaps when not in use.
- Vertical on/off toe movement for ease of operation.
- Large opening facilitates acceptance of material being swept into valve.
- Flanged design reduces the requirement for trim plates.
- Rear Entry design allows for ease of installation.

Fits easily in the kick space of a cabinet, fits easily in 2” x 4” stud wall. REQUIRES short 90 Street El (CVIH-08-90L-230)

HOSE SOCK INSTALLATION INSTRUCTIONS

1. Slide the cardboard tube over the end of the hose that connects to the wall inlet.

2. Without releasing any of the hose sock, push the cardboard tube to the control handle of the hose.

3. Pull a small amount of the hose sock off of the cardboard tube and onto the bottom of the control handle. Tie the string on the hose sock over the bottom of the control handle of the hose.

4. Pull the cardboard tube toward the inlet end of the hose, gradually covering the hose with the hose sock.

5. Don’t forget to include the electrical cord, if there is one.

6. The finished vacuum hose.

1 IWL - Inches of water lift represents how far up a glass tube a vacuum motor will pull a column of H₂O in a sealed system.
2 CFM - Cubic feet per minute measures the quantity of air moved by a vacuum motor at a 2" orifice.
3 Air Watts - Measures maximum working vacuum power at a 3/4" diameter maximum orifice.
All Power Units are pewter in color.

POWER UNIT WARRANTY

90 Day Money Back Guarantee
If you are not completely satisfied with the performance of the Central®Vac brand built-in vacuum power unit within the first ninety (90) days from installation or purchase you may return the unit to us for a full refund minus any shipping costs. The buyer is responsible for the return packaging and shipping. The power unit must be returned in its original box with all the original packaging.

Seven Year Limited Warranty
CentralVac International, as the manufacturer of built-in vacuum systems, warrants the built-in vacuum power unit to be free from defects in material or factory workmanship for a period of seven (7) years from date of purchase and/or installation. This Warranty does not include misuse, abuse, or normal wear and tear.
Should any defect become evident within this seven (7) year period to the aforementioned systems, CentralVac International will repair or replace, at their discretion, any part or parts necessary for system performance without cost to the system owner. This Warranty does not apply to disposable bags, filters, motor brush replacement, and/or physical installation. Disassembly of motor, control box, and/or removal of the identification number as well as running the systems without the proper filtration bags constitutes termination of Warranty. Customer is responsible for any and all shipping costs incurred for returning the unit to the manufacturer for service or replacement.

Lifetime Limited Warranty
A Lifetime Limited Warranty on the Central®Vac brand built-in vacuum power unit applies, whereby any and all defective parts will be repaired, replaced, and/or a new unit supplied, if necessary and at CentralVac International's discretion, to correct the malfunction, at a cost never to exceed fifty (50%) percent of the current published retail price. There will be charges rendered for product repairs due to cause other than those covered by the Seven (7) Year Limited Warranty. This Warranty does not include misuse, abuse, or normal wear and tear. Adjustments under this warranty must be made directly with the manufacturer by the buyer. Disassembly of motor, control box, and/or removal of the identification number as well as running the unit without the proper filtration bags constitutes termination of the Warranty. Customer is responsible for any and all shipping costs incurred for returning the unit to the manufacturer for service or replacement.

Since 1954, CentralVac International has focused on quality, customer service, performance, and dependability.
Nobody knows built-in vacuum systems better than its originator . . . CentralVac International . . . and nobody backs them better.
