HOW TO BUY A CENTRALVAC BUILT-IN VACUUM SYSTEM

Items Needed for a CentralVac Installation

The following items are needed for a functional CentralVac built-in vacuum system.

1. Power Unit
2. Accessory Package (contains hose and all the other accessories needed)
3. Generic Inlet Kit (combine 1 or 3 inlet kits to total the number of inlets needed)
4. Inlet Valves (choose either Direct Connect or Low Voltage)
5. Mounting brackets (purchase separately if Low Voltage inlets are used)
5. PVC Pipe

Here are some options you might want to consider.

1. An extra utility inlet for the garage.
2. A standard hose for the garage, or the Garage Non-Electric Accessory Package.
3. A VacPan or VacuSweep for the kitchen and or utility room.

Power Unit Sizing

Area to be Cleaned (sq ft)	Recommended Power Unit
7,000 and up	CVS-16DP
up to 7,000	CVS-11DP
up to 6,000	CVS-07DP
up to 5,000	CVS-16
2,000 to 4,000	CVS-11
2,000 or less	CVS-07

Note: If you live in a high altitude area (5,000 to 7,000 ft. above sea level) you may need to move up to the next larger unit, or go to a double motor unit. Remember, you can never have a power unit that is too big, or have too many inlet valves in your home!

Number of Inlet Valves

Area to be Cleaned (sq ft)	Recommended Inlet Valves
Rule of thumb: Plan for 1 inlet valve for every 500 to 700 sq ft of cleaning area.	
5,000-6,000	8
4,000-5,000	7
3,000-4,000	5
1,500-3,000	4
1,500 or less	3

Pipe

Rule of Thumb: Plan on 25' of pipe per inlet valve.

ACCESSORIES

Wall Mounted Wand Holder

CVT-04-0114

This wall hanger permits you to hang your wand set and floor tool for convenient storage. It's also strong enough to hold an electric brush or turbine tool.

Wall Tool Caddy

CVT-04-0110 (black)

The Wall Tool Caddy can hang from the Wall Hose Hanger, and provides a convenient place to store your tools.

Wand Tool Caddy

CVT-04-0100

The Wand Tool Caddy snaps onto any wand and stays in place. It mounts three tools for easy access.

RF Control Kit w/ Key Fob

CVT-RF-KIT

This kit can be used as a workaround for bad low voltage wires. By mounting the receiver to your vacuum, you can remotely turn the vacuum on and off from anywhere in your home.

RF Accessories:

CVT-RF-FOB

Replacement or Second Fob

Turbo Dust Interceptor

CVT-04-0010

This small turbo dust filter interceptor is designed to mount between your hose end and wand. It's an ideal way to save money on vacuum cleaner bags for your canister, as it will trap bulky fibrous material from passing into your central vacuum. The unit includes adaptors to make it compatible with both 1.25" (32mm) and 1.375" (35mm) wand sets.

Micro Tools

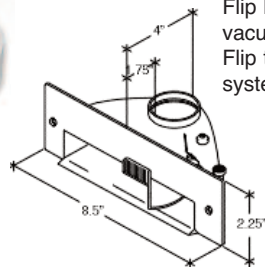

CVT-03-0160

Micro Tools are perfect for cleaning sewing machines, wall heaters, air conditioners, keyboards, printers, computers, dvd's and almost anything that's too small to get an ordinary vac tool into. Kit comes with 3' hose, adapters, oval mini brush, micro round brush, crevice tool and extenders.

DUSTPANS

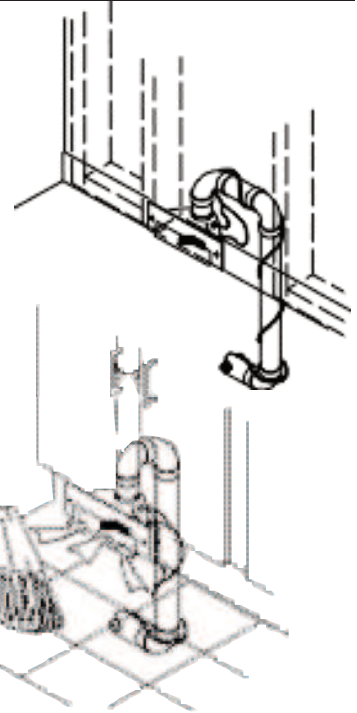

VacPan™

CVT-04-0190 (black)
CVT-04-0200 (almond)
CVT-04-0210 (white)

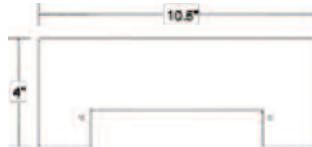

The VacPan™ is easy to install in new and existing kitchen cabinets, walls, or any location with very little clearance. The piping to the system is connected to the top of the VacPan™. The VacPan™ can be installed in a normal 2x4 wall.

Flip lever to the side with your toe, starting the vacuum system, and sweep the dirt into the inlet. Flip the lever back with your toe and the vacuum system will stop.

HOSE SOCK INSTALATION INSTRUCTIONS

1

Slide the cardboard tube over the end of the hose that connects to the wall inlet.

2

Without releasing any of the hose sock, push the cardboard tube to the control handle of the hose.

3

Pull a small amount of the hose sock off of the cardboard tube and onto the bottom of the control handle.

Tie the string on the hose sock over the bottom of the control handle of the hose.

4

Pull the cardboard tube toward the inlet end of the hose, gradually covering the hose with the hose sock.

5

Don't forget to include the electrical cord, if there is one.

6

The finished vacuum hose.
